

Warren County Area Plan & Zoning Office  
125 N. Monroe Street, Suite 1  
Williamsport, IN 47993  
Attn: John Kuiper, Director

Dear Mr. Kuiper

Jordan Creek Wind Farm LLC is developing a wind energy project in Warren County, Indiana and currently filing an Application for a Special Exceptions Approval to Warren County Board of Zoning Appeals. Westwood Professional Services has been retained by Jordan Creek Wind Farm LLC to review certain geographical data related to that filing and certify that the Preliminary Site Layout Plan is geographically accurate.

Jordan Creek has provided, in GIS format, property parcel information and the location of important existing features including houses and above-ground utility lines within the project area. I have been able to complete an independent desk-top review of the data presented by Jordan Creek Wind Farm and can certify that these data line up well with independent sources available to Westwood, and are sufficiently accurate for a Preliminary Site Layout Plan. 5' contours are shown as provided to Westwood Professional Services by Jordan Creek Wind Farm LLC.

Jordan Creek has also provided the location of key proposed Project Facilities and these have been drawn to scale by Westwood on a series of map sheets that have a scale of 1 inch = 1500 feet, when printed on 11x17 paper. These sheets are attached to this transmittal in PDF file format. None of the existing structures or proposed facilities have been surveyed in the field, however, the Preliminary Site Plan and the Scaled Drawings prepared by Westwood form an accurate depiction of the proposed facilities.
