Attn: John Kuiper, Director

**Re: Section 1.11.3.A.14, Re-vegetation Plan for Restoring Area Temporarily Disturbed
During Construction**

Dear Mr. Kuiper,

Per the requirements of the above listed section of the Warren County Wind Energy Conversion Systems (WECS) Siting Regulations, Jordan Creek Wind Farm LLC (JCWF) will implement the following plan for restoration of temporarily disturbed areas after construction of the wind project facilities:

- 1) Upon completion of construction on a landowner's property, JCWF will restore the soil surface on any portion of a property disturbed by JCWF that is not within five feet (5') of the wind project facilities. JCWF will re-plant native grass seed on any portion of that property that was in native grassland prior to construction.
- 2) JCWF will replace any topsoil that was removed back to the location from which it was removed to the extent practicable, or to such other location as may be reasonably requested by the landowner.
- 3) After the wind farm commences commercial operations, JCWF will use commercially reasonable efforts to control weeds resulting from JCWF's use of the property.

Sincerely,

Michael Cressner
Project Developer
