

Warren County Zoning Department

With the spring weather arriving, you may want to begin your building projects soon.

Please don't forget, that if you are adding any type of square footage to your property, you may be required to obtain a permit for the project. If you are in doubt, as to whether or not you need a permit, please don't hesitate in calling the Zoning office. Our number is 765-762-6311.

Just a reminder, that if you are doing a project that requires new or replacing of, windows, doors, siding, or roofing, a permit, is not required for this.

Thank you for your cooperation,

John Kuiper

Zoning Director
