

Acceptable / Unacceptable Waste

The acceptable / non-acceptable materials list is proposed based on our experience. Heritage has the capability to accept or arrange disposal of all household hazardous waste. Heritage leaves the option open for the counties to decide the final acceptable/non-acceptable list.

Any item not on the final contract pricing schedule will be considered unacceptable until a disposal outlet and price are agreed upon by Heritage and the county involved. Heritage will be happy to assist the counties in finding an acceptable disposal outlet for any “unacceptable” item that ends up in the county’s possession.
